**Editorial Submissions**

Please submit editorial to: [editorial@constructionmaguk.co.uk](mailto:editorial@constructionmaguk.co.uk)

For editorial contributions we look for non-promotional content. Editorial pieces are put forward for consideration; there is no guarantee of inclusion.

Alongside our main features, we will also be running additional features in each issue.

**Copy Deadlines**

Copy is required by the first week of a month for the following month's edition – as an example we would require the content by the first week of February to feature in our March edition.

**January**

- Drainage & Plumbing
- Health & Safety
- Technology & Software
- Tools, Plant & Equipment Hire
- Roofing, Cladding & Insulation

**February**

- Fire Safety & Security
- Modular Buildings/Welfare Units
- Sustainability
- Training & Education

**Exhibitions**

- Futurebuild Preview

**March**

- Drainage & Plumbing
- Finance
- Safety
- Tools, Plant & Equipment Hire
- Workwear

**Exhibitions**

- The Fire Safety Event
- The Health & Safety Event

**April**

- Fire Safety & Security

### Training & Education News

#### CITB EMPLOYER NETWORKS HELPED OVER 50,000 LEARNERS ACCESS CONSTRUCTION TRAINING IN 2024-25

The Construction Industry Training Board (CITB) has released its year-and-a-half figures for its Employer Networks initiative.

It was the second full year of operation for the initiative, and figures show the networks supported 50,565 learners in 2024-25, an increase from 11,468 the previous, inaugural year.

The figures also reveal that Employer Networks supported 4,297 employers.

an increase from 7,284 the previous year. 3,895 of the employers supported are small and micro (SMEs), and 26% of the employers supported had not claimed grant in the past 12 months.

There is huge demand for skilled construction workers in the UK, with CITB's Construction Skills Network (CSN) report forecasting the need for over 260,000 new construction workers by 2029.

For almost a third of construction employers, finding suitably skilled staff remains their key challenge, particularly with older workers retiring and not being replaced. By encouraging greater dialogue with employers and removing barriers to engagement with training, the Employer Networks help address the skills gap and build a stronger future for the industry.

#### CAREYS CONSTRUCTION CAMPUS AT OXFORD NORTH'S INAUGURAL STUDENT COHORT CELEBRATES THEIR GRADUATION

The first students to take part in the first Careers Construction Campus at Oxford North, the free three-week training course for people aged 17 years and over, have graduated with flying colours.

Six students, five of whom have joined through SOFCA, the Oxford-based charity that provides education, employability and wellbeing programmes for vulnerable young people, have completed their course in building, mock paving, drainage and finishing.

The course ran for two days a week from 9am to 4pm.

The graduation ceremony saw attendees from Oxford North, Thomas Alberici Oxford, Conyts, Bliss, SOFCA, Skills Learning and Abingdon and Watney College. They were joined by Councillor Susan Brown, leader of Oxford City Council, to see the campus and meet the teachers and students.

The campus is place-based rather than project-based so that upon graduation the students are able to consider jobs at Oxford North and on other construction sites across Oxford and Oxfordshire.

All students have completed their Construction Skills Certification Scheme (CSCS) card training and have had an interview. There have been seven offers of jobs at Oxford North and the remainder have interviews in progress and will be underway to look at placing them at other development sites within the county.

Oxford North is due to open in autumn 2025.

#### FIRST TRANCHE OF ECITB SCHOLARSHIP PROVIDERS ANNOUNCED

New in its sixth year, the Engineering Construction Industry Training Board (ECITB) has announced the first tranche of centres that will deliver its scholarship programme from September 2025, so far awarding contracts to nine training centres to deliver its flagship new entrant programme.

In total, 148 new scholars will be starting ECITB Scholarships in the autumn, with 200 set to begin applications to recruit learners in April and May.

The ECITB Scholarship is a full-time, off-the-job programme aimed at 16-18-year olds, who receive weekly learner allowance during term time.

Learners gain industry-standard qualifications, relevant work experience and a job offer upon completion.

Scholars who complete the programme, which lasts one or two years, often move into apprenticeships in industry or are employed as direct site hires.

As well as the new cohorts, there will be 114 existing scholars completing programmes around Britain in June and July this year.

Hannah Goe, for example, completed an ECITB Scholarship at NETCA and AGCT Industrial Energy Training Academy between 2022 and 2024, before securing a position with United Spares in Rotherham as a trainee technician.

*"We had a great time attending UK Construction Week NEC this year and we would like to thank Construction UK Magazine for brilliantly advertising our presence at the show, which in conjunction with our experience and friendly team lead to us gaining some new and valuable customers due to readers knowing what we had to offer and where to find us on the day, which is fantastic.*

*We look forward to both shows next year and continuing to work with Construction UK Magazine in the future with our advertising."*

**- Clark Drains Ltd**

*"Site Pod began working with Construction UK Magazine prior to our attendance at UK Construction Week at London's Excel back in May of this year. We found them to be professional and supportive, always on hand if/when we had questions about our submissions. The sales team have superb knowledge of the construction industry and shows genuine interest in our product and its success. We are confident that our submission pre-exhibition resulted in more visits to our stand and have been thrilled with the developing interest in our products.*

*"Site Pod is going to revolutionise the construction and refurbishment industries and our submissions with Construction UK Magazine are definitely helping us to get our brand out there and become recognisable suppliers in the welfare and health and safety markets. Thank you for your continued support, Construction UK magazine, we're enjoying working with you!"*

**- Site Pod**

*"We at HFE Signs are a printing company based in the midlands, we cover the UK and have a wide variety of products such as Printed Banners, Printed Signs & Boards and Safety Signs. We target specific markets by several means, one of which being magazine advertising. The team at Construction UK Magazine have always been very efficient to deal with and replies very quickly to emails. We have worked with them for many years now and the service has always been top notch, thanks guys - keep up the good work."*

**- Karl, HFE Signs**

*"Over the past year, Construction U.K Magazine has been a key channel for one of our campaigns.*

*"The variety of digital channels offered has allowed us to reach our target audience by utilising solus email campaigns, website banners, newsletter articles and home page banners. All of which achieved a successful ROI and led to a continuation of our work with Construction U.K. Magazine."*
